I am already an user of the corporate systems. How do I create my unique password?

Resposta (ou solução) (público)

The password USPDigital Portal is also called the Unique Password.

If you are already a user of any corporate system:

- go [1]uspdigital.usp.br and click Create Universal Password
- select the system you already have access
- enter your USP number
- enter the current password for the selected system

NOTE: If you forget the system password, you must create a unique password via the First Access menu enter an alternate e-mail address (other than @usp.br) for sending and / or password recovery

- enter the characters of the security check
- click the UniversalPassword Request button and wait for the receipt of a confirmation e-mail to the address that was previously reported.

NOTE.: sure to check the spam box.

When you receive the confirmation email, click the link contained in the message to be redirected to a page for registering the universal password.
